

# ROHIT KUMAR

MERN Stack Developer | Full-Stack Web Developer

rohitkumar10eng@gmail.com | +91 7392030573 | Kanpur, India | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

## PROFESSIONAL SUMMARY

Fresh B.Tech Computer Science graduate (June 2025) with strong self-driven project experience in full-stack web development. Hands-on with the complete MERN stack through real projects built and deployed independently — including an AI-powered Story Generator using OpenAI & Gemini APIs and a complete E-Commerce platform with secure authentication and order management. Passionate about clean code and intuitive user experiences. Eager to grow within a team and contribute from Day 1.

## TECHNICAL SKILLS

|           |                                                                                                               |
|-----------|---------------------------------------------------------------------------------------------------------------|
| Frontend  | HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Tailwind CSS, Bootstrap, Redux Toolkit                     |
| Backend   | Node.js, Express.js, REST API Design, JWT Authentication, bcrypt                                              |
| Database  | MongoDB, Mongoose, MySQL                                                                                      |
| Tools     | Git, GitHub, Postman, Figma-to-UI, Vercel, Netlify, VS Code                                                   |
| CMS & SEO | WordPress, PHP, Elementor, On-Page & Technical SEO, Keyword Research, Google Analytics, Google Search Console |

## EXPERIENCE

**WordPress Developer & SEO Executive** | True Technologies | May 2026 – Present

- Build and maintain WordPress websites using the Astra theme, Elementor, and custom CSS — including a full VPN affiliate authority site with mega menus, custom headers/footers, and responsive layouts.
- Implement on-page and technical SEO — keyword research, content structure, internal linking, and performance optimization — tracking results via Google Analytics and Search Console.
- Set up site backups, configure navigation and mega menus, and deliver editable, UI-based solutions so non-technical stakeholders can manage content independently.

**MERN Stack Developer Trainee** | QSpiders, Noida | Aug 2025 – May 2026

- Undergoing intensive project-based full-stack training covering MongoDB, Express.js, React.js, and Node.js with focus on real-world development workflows and industry coding standards.
- Built RESTful APIs with JWT-based authentication, protected route middleware, and MongoDB/Mongoose integration; applied Redux Toolkit and React Router v6 across multiple projects.
- Delivered 3 capstone projects independently — an e-commerce store, task manager with CRUD, and a role-based authentication system — from development to deployment.

**Frontend Developer – Independent Projects** | Self-Initiated | Remote | March 2025 – Present

- Built 3+ responsive React.js applications by converting Figma designs to pixel-perfect UIs; integrated OpenAI, Gemini AI, and Clerk Auth to power AI-driven features in production.
- Achieved Lighthouse scores of 90+ using lazy loading, code splitting, and image optimization; deployed all projects on Netlify and Vercel with GitHub-based CI/CD.

## PROJECTS

**AI Story Generator** [ai-story-generator.netlify.app](#)

React.js (Vite) • Tailwind CSS • OpenAI API • Gemini AI • Clerk Auth • JWT • Node.js • Express.js • MongoDB

- Full-stack AI app where users generate stories and illustrations via OpenAI & Gemini APIs, with a real-time credit wallet system tracking per-user API usage limits.
- Multi-layer auth using Clerk + JWT with protected routes and role-based access; optimized for real-time feedback across all screen sizes.
- Designed fully responsive UI with Tailwind CSS; handled async API calls with proper loading states, error boundaries, and smooth user feedback throughout the app.

**E-Commerce Store – Sporting Goods** [sporting-goods.netlify.app](#)

React.js • Redux Toolkit • Axios • Node.js • Express.js • MongoDB • Mongoose • JWT

- Full-stack e-commerce platform with product listings, shopping cart, user auth, and order management — backed by 10+ custom RESTful API endpoints.
- Redux Toolkit for state management; JWT-secured backend routes with role-based access control separating admin and customer functionality.
- Implemented product search and filter functionality, dynamic cart quantity updates, and order history tracking with a clean, mobile-responsive UI.

**Personal Portfolio Website** [rohit221952.github.io/rohitkumar-portfolio](#)

React.js • Tailwind CSS • Framer Motion • Vite • GitHub Pages

- Responsive portfolio with Framer Motion animations and 95+ Lighthouse score; deployed live via GitHub Pages CI/CD pipeline.
- Showcases projects, skills, and contact section with smooth scroll navigation; optimized assets and lazy loading ensure fast load times on all devices.

## EDUCATION

**B.Tech – Computer Science & Engineering**

Kanpur Institute of Technology (KIT), Kanpur, India | Graduated: June 2025

## CERTIFICATIONS

**Full Stack Web Development Certification** — QSpiders, Noida | 2026
